Education

Simon Fraser University

Bachelor of Applied Science - Computer Engineering (BAS)

- Dean's Honour Roll 2026

Sep 2022 – May 2027

Burnaby, B.C. Canada

Technical Experience

Software Engineer

May 2025 – Dec 2025

TELUS

Vancouver, B.C. Canada

- Deployed a scheduled **Python Cloud Function** to **Google Cloud Platform** via **Terraform** to **automate** daily client data backups, ensuring secure and reliable data retention.
- Increased team efficiency by **developing a Python-based CLI tool** using the **Looker SDK**, automating repetitive reporting tasks and leading to time saved.
- Extended the CLI tool's functionality to mass export Looker data as **JSON** and upload it to a **Google Cloud Storage bucket**, enabling seamless data backup and creating a safer environment.
- Improved the **Agile development** team by creating comprehensive documentation on **Git workflows**, including **releases, tags, and pull requests**, leading to an organized standard in the team's workflow.

Firmware Developer

Sep 2022 – Sept 2025

Robot Soccer Club - Simon Fraser University

Burnaby, B.C. Canada

- Developed and maintained embedded firmware in **C** for the soccer-playing robot's control systems, powered by an **ARM-based** microcontroller.
- Implemented and configured a **GitLab CI/CD pipeline** to automate building and testing of the codebase, improving deployment reliability and efficiency.
- Implemented and tested embedded **drivers** for **I2C, SPI, and UART** communication protocols, facilitating seamless integration between the robot's hardware components.

Projects

Full portfolio: ali-shamsi-dev.netlify.app

Therassist | *Techniation: AI at the Edge of Innovation Challenge* | 🐙 [Code](#) | 📺 [Demo](#)

Feb 2026

- Developed a comprehensive therapy screening application by building a **Next.js** frontend and **FastAPI** backend, enabling the generation of AI-powered clinical reports to assist therapists.
- Tracked patient emotions and spoken responses continuously by integrating **DeepFace, OpenCV, and OpenAI Whisper**, allowing for real-time facial expression analysis and audio transcription during therapy sessions.
- Generated private and compliant clinical summaries by configuring **Large Language Models** to run on secure **AI Factory GPUs**, resulting in sovereign infrastructure for secure data processing.

SteadyScript | *nwHacks 2026* | 🐙 [Code](#) | 📺 [Demo](#) | ⓘ [Info](#)

Jan 2026

- Built an **award-winning** real-time motor tremor therapy system by integrating an **OpenCV computer vision** pipeline with a **React** frontend and **Arduino-based** hardware feedback, creating an accessible biofeedback tool that **won two top prizes at nwHacks 2026**.
- Delivered low-latency biofeedback that accurately quantified user tremors by engineering a custom **Python** lateral jitter detection algorithm and a **FastAPI/WebSocket** streaming backend, successfully leading to attracting interest from a pre-accelerator cohort.

PhishNet.AI | *AI and Machine Learning Hackathon* | 🐙 [Code](#) | 📺 [Demo](#)

July 2025

- Automated the classification of malicious messages by training a **machine learning model** on an open-source dataset, leading to accurate **detection of phishing emails** with high precision.
- Iteratively improved classification accuracy by implementing a **Support Vector Classifier** with **scikit-learn** and applying **TF-IDF vectorization**, yielding reliable conversion of emails to numerical features tracked via **Pandas**.
- Improved accessibility to email threat analysis tools by building a functional web application using **Flask** and **JavaScript**, empowering users to input messages and receive real-time phishing detection results.

Technical Skills

Languages: Python, SQL, C/C++, CUDA, TypeScript, JavaScript

AI & ML: LangChain, Hugging Face, TensorFlow, PyTorch, OpenAI API, scikit-learn, pandas, NumPy, OpenCV, LLMs

Frameworks & Libraries: React, Next.js, Node.js, FastAPI, Flask, REST APIs, WebSockets, TailwindCSS

Cloud, DevOps & Tools: Google Cloud (GCP), Docker, Terraform, Git, CI/CD, Linux, Claude Code, OpenClaw, Agile
